## Who are we

Makazi Fumigation & Hygiene Services is a professionally registered and fully licensed Tanzanian company specializing in comprehensive fumigation, pest control, and hygiene solutions for residential, commercial, institutional, and industrial environments. Registered under BRELA No. 608926 and licensed by the Tanzania Plant Health and Pesticides Authority (TPHPA), Makazi operates in strict compliance with national regulatory, safety, and environmental standards.

Driven by a commitment to protecting health, property, and operational continuity, Makazi delivers targeted, effective, and environmentally responsible pest management and hygiene services tailored to the unique needs of each client. Our operations are supported by inspected facilities, approved equipment, and a trained professional team whose technical competence has been formally assessed and certified by the relevant authorities.

With an expanding footprint across Dar es Salaam, Morogoro, and Dodoma, Makazi has earned the trust of leading institutions, corporates, hospitality facilities, and public-sector organizations by consistently delivering reliable, timely, and results-driven solutions. Beyond pest elimination, we focus on long-term prevention, hygiene assurance, and peace of mind ensuring safe, clean, and compliant environments where people can live, work, and thrive.

## What we Believe in

### Our Mission

To protect people, property, and livelihoods by delivering safe, reliable, and environmentally responsible fumigation, pest control, and hygiene solutions—carried out with professionalism, care, and a deep respect for health, dignity, and peace of mind.

### Our Vision

To become Tanzania's most trusted partner in creating clean, safe, and pest-free environments setting the standard for excellence, safety, and innovation in fumigation and hygiene services while positively impacting communities we serve.

- Tissue Dispensers
- Air Freshener Dispensers
- Hygiene Consumables Refill & Maintenance

### Inspection, Assessment & Preventive Programs

- Post Risk Assessment & Site Inspection
- Preventive Pest Management Programs
- Routine Maintenance Contracts
- Emergency Pest Control Response

## 1 Fumigation & Pest Control

Our General Pest Control services are designed to protect residential, commercial, and industrial spaces from common pests that threaten health, comfort, and property. We conduct a thorough site inspection to identify pest types, infestation levels, and risk areas, then apply targeted treatment methods using approved, environmentally responsible products.

Our approach focuses not only on eliminating existing pests such as cockroaches, ants, mosquitoes, rodents, and crawling insects, but also on preventing re-infestation through strategic control measures and professional guidance. All treatments are carried out by trained personnel in strict adherence to safety standards, ensuring minimal disruption to occupants while delivering effective, long-lasting results.

### 3 Timber & Structural Treatment

Timber is one of the most vulnerable components of any structure when left unprotected. Our Timber and Structural Treatment service is specifically designed to reinforce and extend the lifespan of wooden elements by shielding them from termites, wood-boring insects, and moisture-related decay.

Rather than applying one-size-fits-all solutions, we assess how and where the timber is used within the structure and apply targeted treatments. This service is ideal for both new developments and existing buildings where long-term durability, safety, and structural stability are critical. By strengthening timber at its most exposed points, we help prevent costly repairs and structural failures before they occur.

#### Timber & Structural Treatment

- Timber Injection
- Timber Treatment & Preservation
- Wood-Boring Insects Control
- Pre-Construction & Post-Construction
- Anti-Termite Treatment

### 4 Hygiene Products supply & Installation

To support effective hygiene management, Makazi supplies and installs essential hygiene products that ensure cleanliness is maintained long after service delivery. We provide reliable hygiene solutions for washrooms, kitchens, offices, and high-traffic public areas, helping clients maintain consistent standards with minimal effort.

Our service includes the supply, installation, refilling, and maintenance of hygiene equipment such as hand sanitizer dispensers, tissue dispensers, air freshener units, and approved cleaning chemicals. By combining quality products with professional support, we help organizations create cleaner, more organized, and user-friendly spaces while reducing hygiene-related risks and operational gaps.

#### Hygiene Products Supply & Installation

- Detergents & Cleaning Chemicals Supply
- Hand Sanitizer Dispensers
- Tissue Dispensers
- Air Freshener Dispensers
- Hygiene Consumables Refill & Maintenance

## Some of our Fumigation activities

## 2 Specialized Fumigation services

Our Specialized Fumigation Services are designed to protect high-value goods, sensitive materials, and regulated commodities from pests that can cause contamination, loss, or non-compliance. We provide controlled fumigation solutions for containers, warehouses, storage facilities, and agricultural products, following nationally approved procedures and safety standards.

Each assignment begins with a detailed assessment of the cargo or facility to determine the appropriate fumigation method, dosage, and exposure period. Our trained technicians use certified chemicals and equipment to ensure effective pest eradication while safeguarding product integrity, human health, and the environment. These services are ideal for importers, exporters, storage operators, and agribusinesses that require reliable, compliant, and traceable fumigation solutions.

### Specialized Fumigation Services

- Container Fumigation
- Warehouse & Storage Fumigation
- Cereals & Tobacco Fumigation
- Flower & Horticultural Fumigation
- Export & Import Cargo Fumigation
