About us

At BARTECH TANZANIA LIMITED, we don't just build infrastructure — we engineer progress, power possibilities, and manage the systems that keep the nation moving.

Incorporated under BRELA (Certificate No. 18009543), we are a proudly Tanzanian company specializing in Civil Infrastructure, Building Construction, Electrical Installations, Energy Infrastructure, Building Management, From the ground beneath to the systems above, our work is designed to be resilient, smart, and sustainable.

What sets us apart? It's not just our technical expertise — it's our mindset. We approach every project with the precision of engineers, the agility of innovators, and the responsibility of partners who care deeply about impact.

Whether we're delivering a road that connects communities, a building that inspires growth, or a facility system that ensures continuous performance — we operate with one guiding belief.

“Infrastructure isn't just about what's built. It's about what it makes possible.”

Our Vision

To be the leading force in shaping sustainable infrastructure and energy solutions that power progress, inspire innovation, and transform communities across the nation and beyond.

Our Mission

To deliver reliable, efficient, and future-ready solutions across civil works, construction, energy, electrical systems, and facility management, ensuring that every project contributes to lasting growth and national transformation.

Our Core Values

Integrity

We do what we say with honesty, transparency, and strong ethical standards at the heart of everything.

Excellence

We don't settle for average. Every project reflects our commitment to top-tier quality and precision.

Innovation

We embrace technology and creativity to solve complex challenges and deliver smarter, more efficient solutions.

Safety

We prioritize people and process safety on every site, every system, every time.

Sustainability

We build with tomorrow in mind, promoting eco-conscious practices and long-term value creation.

Client-Centricity

We listen, adapt, and deliver placing the client's vision and satisfaction at the core of our service.

Company Structure

Our Services

Civil Infrastructure
Roads, bridges, drainage, water supply, sewage systems, etc.

Building Construction
Residential, commercial and institutional buildings.

Electrical Services
Installation, maintenance, energy audits, power systems.

Energy Infrastructure
Solar, grid systems, substations, energy consulting.

Facility Management
Maintenance, repairs, systems monitoring, cleaning, HVAC, etc.

Electrical Services

Our Electrical Services are designed to power progress, ensure reliability, and maximize efficiency across residential, commercial, and industrial environments. We specialize in the installation, maintenance, and optimization of electrical systems that are safe, scalable, and compliant with both local and international standards.

Electrical Installations

From small-scale wiring to full-scale electrical infrastructure, we design and install systems that are built for durability and optimal performance.

Preventive & Corrective Maintenance

We offer routine inspections, repairs, and system upgrades to prevent breakdowns and extend the life of your electrical infrastructure.

Energy Audits & Optimization

Our energy audit services help clients identify inefficiencies, reduce operational costs, and improve energy usage across their facilities.

Power Systems & Backup Solutions

We design and install power distribution systems, including generators, transformers, switchgear, and backup solutions that ensure continuous operations during outages.

Building construction

Construction is more than a technical process; it's a partnership. We collaborate with clients to bring their boldest visions to life, transforming bare land into structures that command presence, deliver function, and inspire confidence.

Whether you're building from the ground up or expanding what already exists, we offer unmatched expertise in delivering well-planned, beautifully executed and structurally sound spaces on time and on budget.

Our scope of work

Residential Buildings

Homes, apartments, and housing units.

Commercial Buildings
Offices, shops, and business complexes.

Institutional Facilities

Schools, hospitals, government and NGO buildings.

Industrial Buildings

Warehouses, workshops, and factories.

Renovations & Expansions

Upgrades, remodels, and structural improvements.

Facility Management

We provide comprehensive Facility Management services that ensure your buildings, systems, and environments operate safely, efficiently, and without disruption. We take the stress out of managing day-to-day operations, allowing you to focus on what matters most – your core business.

Our approach combines technical expertise, preventive maintenance, and responsive support to protect your assets, extend the lifespan of infrastructure, and reduce downtime.

Our scope of covers

Electrical & Mechanical Systems Maintenance

Lighting, power, HVAC, and generators.

Plumbing & Sanitation Services

Leak repairs, drainage, and water systems.

Routine Inspections & Preventive Maintenance

Early detection and resolution of faults.

Cleaning & Environmental Services

Daily upkeep and hygiene compliance.

Building Repairs & Upgrades

Structural fixes, refurbishments, and modifications.

Security & Access Systems Support

Surveillance, alarms, and access control.

Commitment to Quality & Safety

We believe that commitment to quality and safety is paramount in the civil engineering and construction industry. We understand the importance of delivering projects of the highest standard, while ensuring the well-being of our workforce, clients, and the surrounding environment. Here's how we uphold our commitment to quality and safety:

Skilled and Experienced Team

Our company is comprised of a team of highly skilled and experienced civil engineers, construction professionals, and project managers. With their vast knowledge and expertise, they ensure that every aspect of our projects adheres to the highest quality standards and safety regulations.

Rigorous Quality Control Measures

We implement rigorous quality control measures throughout the entire project lifecycle. Our team conducts regular inspections, assessments, and tests to ensure that the materials used, construction methods employed, and workmanship meet and exceed industry standards.

Adherence to Safety Protocols

Safety is our top priority. We have a comprehensive safety management system in place that strictly adheres to local and international safety regulations. We conduct regular safety audits to identify potential hazards and take proactive measures to mitigate risks and maintain a safe working environment.

Use of Technological Advanced Tools

We employ cutting-edge technology and state-of-the-art equipment to enhance the precision, efficiency, and safety of our construction projects. Our advanced tools enable us to conduct accurate measurements, perform complex calculations, and implement innovative building techniques, ensuring the highest level of quality and safety.
